

New HealthAlliance Hospital For You

As your community hospital, we are investing in Kingston by enhancing facilities and improving access to medical treatment, technology and talented specialists.

New and Expanded Services, Closer to Home

Westchester Medical Center Health Network (WMCHealth) is nearing completion on a new, technologically advanced HealthAlliance Hospital in Kingston to better serve our patients and community. We also continue to increase the depth and breadth of services, advanced technology, and specialized medical talent offered right here.

Our new HealthAlliance **Cardiac Catheterization** Laboratory significantly expanded this region's access to advanced heart care services, and has already provided interventions to hundreds of people. This 24/7 life-saving cardiology program is the first and only of its kind in Ulster County. If you experience cardiac distress symptoms, call 911 or go to the nearest emergency department. To schedule an appointment for an exam or procedure with a WMCHealth Heart and Vascular Institute Specialist, please call 845.339.3663.

We recently announced the return of **inpatient psychiatry** services to Kingston which, when complete, will complement existing 24/7 emergency services and outpatient programs for behavioral health and substance abuse recovery. Individuals who need these services in an emergency should call 911.

WMCHealth Physicians at Kingston provides personalized and lifelong access to **primary healthcare** for all members of the family, including infants, children, adolescents, adults and seniors. Our primary care practice team delivers timely care for conditions ranging from minor illnesses to the management of chronic diseases, and can seamlessly coordinate your care with other WMCHealth specialists. To schedule a convenient appointment, please call 845.338.1535.

Join Us as We Reimagine the Future of Health Care in Kingston

We are grateful to our colleagues who want to provide safe care and the best experience possible to our community. If you, or someone you know, would like to consider joining our growing network, you can learn more at **wmchealthjobs.org**. We have positions available right now with competitive pay rates and strong benefits.

New HealthAlliance Hospital on Mary's Avenue on Track to Open

Health Alliance's \$92 million hospital expansion and enhancement will offer a technologically advanced, comfortable and welcoming healthcare environment when it opens later this year. The new hospital will feature an emergency department with a behavioral health triage area; a Family Birth Center with private rooms for birthing mothers; advanced critical care capabilities; private rooms; and advanced imaging supported by Westchester Medical Center Health Network's partnership with Philips. Please visit **www.hahv.org/new-healthalliance-hospital** for more information and to request a tour.
